PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years architecting production systems across Node.js, Django, and React. Specialized in API optimization (40% latency reduction), secure authentication (zero breaches), and real-time systems serving 1000+ concurrent users. Proven ability to design, code, and deploy complex full-stack features independently.

WORK EXPERIENCE

Full Stack Developer

Remote

Freelance

August 2024 - Present

- Engineered 6+ production full-stack applications managing complete lifecycle from architecture through deployment, serving 1000–2000 concurrent users with sub-100ms response times.
- Devised 5+ secure authentication systems implementing OAuth 2.0, JWT, 2FA, and OTP, achieving zero security breaches across applications handling sensitive financial and healthcare data.
- Optimized API performance by implementing 15+ strategic database indexes, resulting in 40% reduction in average response latency.

Python Full Stack Developer Intern

Ernakulam, Kerala

Inmakes Infotech

April 2025 - July 2025

- Analyzed 12+ slow database queries through execution plan review and indexing optimization, delivering 35% improvement in query execution time.
- Constructed 8+ reusable React components following DRY principles, reducing code redundancy by 50% and accelerating feature development velocity.
- Debugged and resolved critical performance bottlenecks across the full-stack application, contributing to stable production releases.

Junior Software Developer Intern

Ernakulam, Kerala

Soften Technologies

November 2023 - April 2024

- Programmed 6+ Django CRUD modules with complex business logic for patient management systems, appointment scheduling, and billing workflows.
- Rectified 30–40+ UI and backend defects through systematic debugging, reducing production deployment delays.
- Implemented backend authentication solutions utilizing RBAC and user management pipelines, enhancing system security.

PROJECT EXPERIENCE

E-Hospitality - Hospital Management System

github.com/sreejith-as/e-hospitality | Django 5, PostgreSQL

- Designed and built hospital management platform handling complete patient lifecycle with role authentication and RBAC isolation.
- Architected PostgreSQL schema with strategic indexing, enabling sub-second query response times for thousands of concurrent requests.
- Formulated automated billing engine calculating treatment costs and insurance claims, reducing administrative overhead by 40%.

Career Tracker - Job Application Manager

github.com/sreejith-as/career-tracker | Node.js, Express, React, Tailwind CSS

- Developed job tracking platform enabling users to organize and manage 100+ applications with status tracking and dashboard analytics.
- Established resume version management system allowing users to track multiple resume versions alongside applications.

Ciphernet – Real-Time Social Platform

github.com/sreejith-as/ciphernet | Django, WebSockets, PostgreSQL

- Conceptualized complete social platform with user profiles, connection management, and encrypted messaging demonstrating full-stack systems architecture.
- Implemented real-time bidirectional communication layer utilizing WebSockets, achieving sub-100ms message delivery latency for instant interactions.

SKILLS

- Frontend:** React.js, JavaScript (ES6+), TypeScript, Tailwind CSS, State Management.
- Backend:** Node.js, Express.js, Django, Django REST Framework, REST API Design, WebSockets, Real-time Systems.
- Databases:** PostgreSQL, MySQL, SQLite, MongoDB, Query Optimization, Indexing.
- DevOps & Cloud:** Git, GitHub Actions (CI/CD), Vercel, Netlify, Postman.
- Security:** OAuth 2.0, JWT, RBAC, Password Hashing, CORS, Data Encryption.

EDUCATION

Soften Technologies

Python Programming

Ernakulam, Kerala

Graduation Date: October 2023

Universal College of Arts and Science

Bachelor of Computer Applications

Mannarkkad, Kerala

Graduation Date: April 2023
